Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-14, drawn to a gathering stapler, classified in class 227, subclass 110.

Group II. Claims 15-19, drawn to a method of driving and operating a gathering stapler, classified in class 227, subclass 107.

2. The inventions are distinct, each from the other, because of the following reasons:

Inventions of Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of Group II discloses executing a variable collecting-chain movement adapted to a simultaneous operation of the stapling carriage. Although the apparatus of Group II discloses possible means for executing such functions, alternate functions could also be carried out, creating a different process under which the apparatus could function. Such as, a process without a simultaneous operation of the collecting-chain and staple carriage, or a process that provides simultaneous operation of other subassemblies, such as the delivery and ejector sub assemblies. Therefore, the means and elements of the apparatus of Group I are not limited to the process of Group II and could very well operate under a different method.

Because these inventions are distinct for the reasons given above, and because they have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes, as indicated is proper.

Art Unit: 3721

3. A telephone call was made to Mark P. Weichselbaum on July 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gloria R Weeks whose telephone number is (703) 605-4211. The examiner can normally be reached on 9:30 am - 8:00 pm Monday-Thursday.
